

Turnin

An inwards swiveling seat base for transfer to and from the wheelchair inside the vehicle.

Turnin swivels the seat inwards and makes transfer between wheelchair and car seat inside the vehicle possible. Turnin is powered and operated via a hand-held control.

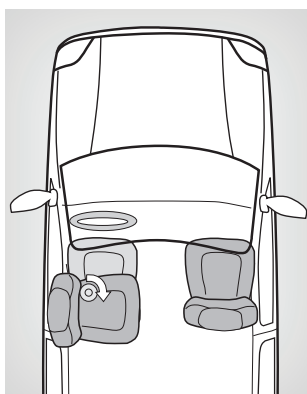

Quick facts

- Easy and fast to install
- Alternative to Autoadapt 6-Way Base when length, height and full swivel adjustment is not needed
- EMC and crash test approved
- CE-marked

To guarantee your safety all Autoadapt products are designed and tested according to current directives and standards.
